

5th Street Improvements & Flood Protection Projects

Major road projects will close portions of 5th Street between 1st Avenue and 9th Avenue from late March through late summer 2015

About the Projects

This spring and summer, “Reimagine 5th” as 5th Street undergoes numerous enhancements between 1st Avenue and 9th Avenue. The projects include:

- **Flood Protection:** Reconstruct and elevate 5th Street over Biscuit Creek, from 3rd to 4th Avenues, as a final flood protection measure in the neighborhood.
- **Street Improvements:** Reconstruct 5th Street from 6th to 9th Avenues and enhance 5th Street from 4th to 6th Avenues, with new sidewalks, streetscape improvements, lighting, landscaping, and stormwater planters from 1st to 9th Avenues.
- **Utility Relocation:** Relocate overhead private utilities to underground from 1st to 10th Avenues.

About 5th Street

5th Street was part of the original U.S. Route 6 and has been an arterial street throughout our community’s development. Recent redevelopment along 5th Street, planned street reconstruction and improvements, and flood mitigation projects—combined with a community-friendly and walkable corridor, trail connections, transit access, historic attractions, and public spaces—bring the project full circle.

For more information about the project, visit www.coralville.org/reimagine5th.

Street Closures & Traffic Impact

- Portions of 5th Street between 1st Avenue and 10th Avenue are scheduled to close starting Wednesday, March 25, 2015 until late summer.
- Some segments will have intermittent or one-lane closures during the project.
- Access to adjacent properties will be maintained as much as possible. We realize this project is an inconvenience and are working to minimize its duration.

Transit Impact

- Coralville Transit will experience route and stop changes on 5th Street between 1st and 10th Avenues for the Lantern Park, 10th Street, and Night and Saturday routes beginning Wednesday, March 25, 2015 until late summer. A list of impacted stops, and alternative stops for passengers, is available at www.coralville.org/transit.
- Service delays are anticipated.
- Route changes, road closures, and traffic delays will make predicted bus arrival times on Bus on the Go (Bongo, www.ebongo.org) inaccurate during the rerouting. Real-time maps on Bongo with actual bus locations will be accurate and should be used to locate buses.
